Congressman Donald Payne, Jr.
60 Nelson Place, 14th Floor
LeRoy F. Smith, Jr. Public Safety Building
Newark, NJ 07102

Dear Congressman Payne:

On behalf of everyone at Quality Testing Services, Inc. (Quality Testing), I'm writing to you today to ask for your help in advocating for reform to the Renewable Fuel Standard (RFS). Without swift and meaningful action by the Biden Administration, our region's last remaining oil refineries may close their doors forever, eliminating hundreds of direct jobs and causing irreversible reverberations in our region that will impact thousands of indirect jobs, like those provided by our company.

Quality Testing Services, Inc. (QTS) was established in 1980 and is a nondestructive inspection and consultant company located in Linden, NJ. QTS currently employs forty-five people that mainly work in the Petro-Chemical industries located in New Jersey, Delaware and Pennsylvania.

Refineries, particularly those in the Northeast have one of the highest job multipliers of any industry in the country. They rely on the material support, personnel and expertise that companies like ours provide to them. Their dependence on Quality Testing, and many other businesses in turn supports thousands of good paying, family sustaining jobs throughout the tristate region. This interdependence is critical, and it has been a major boon for our regional economy for decades.

But the RFS in its current form threatens the continued viability of independent refiners, particularly in the Northeast, and it is therefore a direct threat to the economic well-being of our company as well. For years now, local independent refiners like Monroe Energy and PBF have been forced to buy RIN credits at exorbitant prices, and these credits have swung wildly. Additionally, it is worth noting that these expenditures have done very little to create actual benefits for the environment as noted by The National Wildlife Federation and others, or to help expand renewable fuel production, or to benefit the hard-working American farmers that it was intended to provide.

This is a critical issue for our region, and without a change to the program's current structure, the goals of the program will not be met and our national and energy security along with tens of thousands of good paying jobs will be at risk. On behalf of our company, we respectfully request that you contact the EPA and the Biden Administration and ask them to take swift and meaningful action to address the out-of-control costs associated with the RFS before it is too late. The economic livelihoods of many businesses

in our region and of thousands of people employed by companies like ours are depending on it. Thank you for your time and consideration of our request.

Sincerely,

Adam R. Roina

President

Quality Testing Services, Inc.
